Visions of the Vernacular: *Architecture in the Masterworks Collection*

Curated by Dr Sara Thom and Max Grainge, Visions of the Vernacular will be on display from May 1 – September 12, 2026.

This collection highlights fundamental elements of Bermudian architecture which artists in the Permanent Collection represent from a variety of perspectives – depicting the geometric patterns of rooflines, the half-secluded spaces of verandas, and the framing forms of gates and pillars. These images invite the viewer to consider the social functions and symbolic meanings of these and other vernacular architectural features, as understood by the people living within and around them as well as the artists illustrating them.
